

YOUR PRODUCT IDENTIFICATION EXPERTS

Industrial systems for product labelling and dispensing

More than 100 solutions
for the packaging industry

**Experience
and flexibility
for primary
and secondary
packaging**

Etipack designs, manufactures and sells labelling and coding systems with pressure sensitive labels, friction feeders and pick and place devices for product handling and distribution. Since 1978 Etipack has been a leading company in Italy within the packaging machines industry.

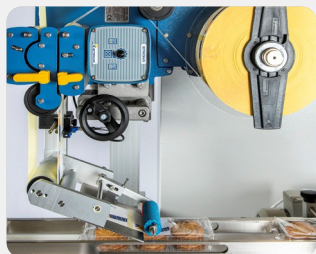

Etipack's UK distributor, Advanced Labelling Systems Ltd (ALS) is a British company that has been making automatic labelling machines since 1997, at their own assembly workshops. They provide full UK sales and service support for Etipack equipment.

Etipack and ALS are part of the PID - Possehl Identification Solutions division, by Possehl Group.

Labelling and Coding

A wide range of systems for standard, and tailor-made solutions to meet the labelling requirements and targets of the most demanding markets.

Labelling Machines

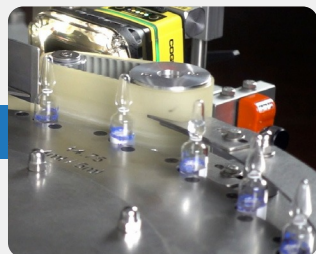

Machines and applicators for the broadest variety of applications allowing for adaptable and fully customisable configurations. Variable speeds and labels dispensing sizes.

Labelling Systems

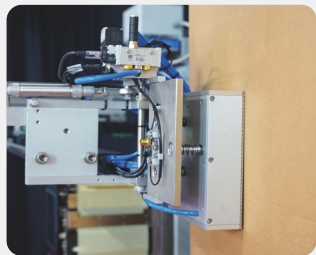

Automatic lines for conveying, handling and labelling of products in all shapes and materials. Numerous label applications such as wrap-around, top, bottom, side, double-sided, tamper-evident.

Pharma Systems

Labelling, trace-ability and serialisation solutions meeting all pharmaceutical packaging requirements & complying with the latest regulations. Machines fulfilling quality, safety, productivity and accessibility standards.

Print & Apply

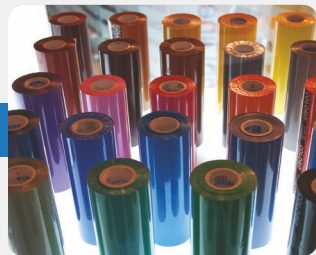

Automatic machines for the application of last printed labels on boxes, pallets, and bundles at the standstill or on the move.

Thermal Printers

High-quality printing of barcodes and codes, variable text, and images. Markers and coders for hot-foil printing, thermal transfer printing and inkjet printing.

TTR Ribbons and Foils

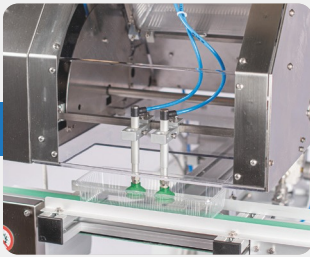

Thermal Transfer Ribbons (TTR), Hot Stamping Printing Foils and Thermal Inject (TIJ) cartridges are compatible with hot foil coders, thermal transfer coders and inkjet coders from leading manufacturers.

Feed

Feeding and Dispensing

Friction and vacuum feeders as well as machines for handling, loading, and distributing, to provide for a wide variety of applications within packaging lines.

Pick & Place

Machines for loading, handling and distributing products into the packaging line. They can distribute flat products, such as sachets and pouches, as well as trays, or apply header cards on bagged products.

Friction Feeders

Machines for in-line feeding of products and items such as vouchers, leaflets and others inserts, on-demand. Ideal to integrate with OEM equipment and high-speed precision packaging lines. Suitable for wide variety of applications.

Our key markets

Know-how acquired on the field

We manufacture **technological excellences** that meet the most advanced market sectors requirements through diversification.

We manufacture value-for-money solutions for packaging to make our technology accessible to many.

We build machines and strong relationships, worldwide

A reliable ally for a valuable, long-lasting partnership

OEM and machine builders

A full range of sturdy and modular solutions for rapid customisation to specific needs, that can be easily integrated into full packaging lines as well as to end-of-line to perform product labelling and handling operations of complementary packaging products.

Manufacturing companies

A wide variety of solutions for product packaging that can be used for stand-alone processing or integrated into production lines. Value for money systems accessible to companies with production needs from the simplest to the most complex.

A wide network to be closer

Our network of branches and subsidiaries in key markets, allows us to have a direct international presence, ensuring a more accurate and timely service in over 30 countries in the world through technical centres, resellers and sales agents.

The power of experts in product identification

As member of PID - Possehl Identification Solutions we can offer access to the full product portfolio from all partner companies, a wider global support presence and even more expertise and experience.
