

CONSUMABLES, PARTS AND ACCESSORIES

In order to operate the machines smoothly you need the right labels and ribbons. Whether large or small, made of paper or plastic, used with standard or special adhesives; we deliver labels and ribbons which are ideal for a wide range of applications. We exclusively use high-quality and extremely resilient materials, which have been developed especially for use in industrial environments on our hardware solutions. What do all of our consumables have in common? Their superior quality and therefore maximum reliability and readability.

ALS

Labelling machines to apply labels to products, outer packaging and pallets.

DATAKAMP

Developing and manufacturing electronic system components for industrial applications since 1985.

KÖLLE

The expert for adhesive labels of all types for flexible packaging in the food industry (such as teas).

LABELCRAFT

Label printing software for demanding production environments where reliability is critical.

LSS

Leading manufacturer of labeling solutions in Scandinavia with focus on the pharmaceutical industry.

NORDVALLS

Nordvalls manufactures all types of multicoloured and clear adhesive labels.

WATERMILL

Outer-case, tray-end and pallet labels delivered to the highest standards retailers and distributors need.

POSSEHL IDENTIFICATION SOLUTIONS

YOUR PRODUCT IDENTIFICATION EXPERTS

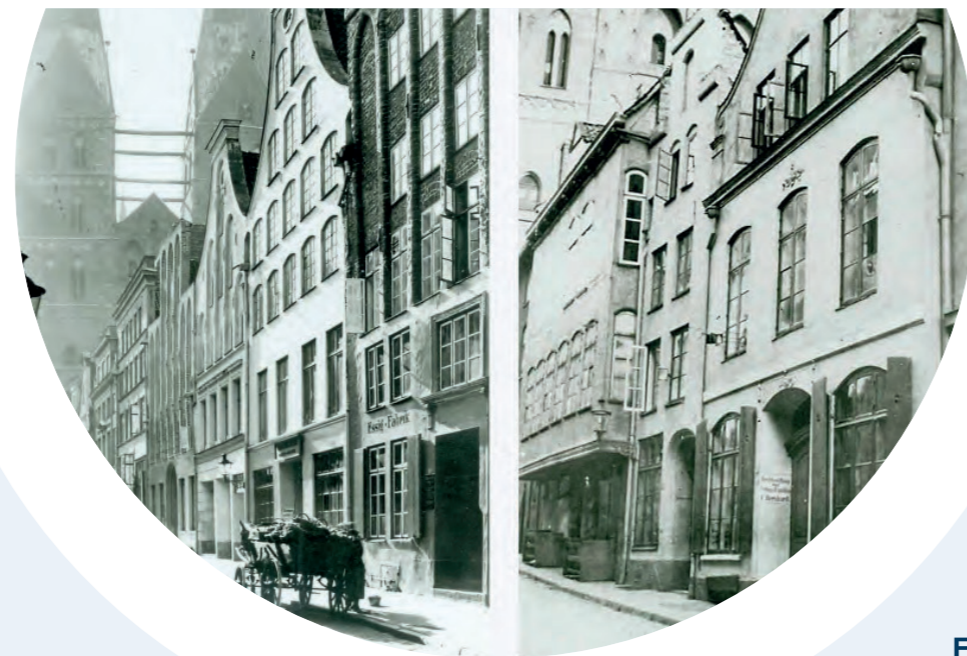

THE POSSEHL GROUP

With over 175 years of history

As a successful, internationally operating group with a history spanning over 175 years, the name Possehl combines both tradition and innovation with entrepreneurial diversity. The Possehl Group is convinced that small and medium-sized enterprises will continue to be the backbone of the economy in the future.

Possehl is a longterm partner, which successfully manages all companies in the Group with the right combination of freedom and leadership. There is a high degree of autonomy and direct responsibility on the part of the companies management teams.

PID - YOUR PRODUCT IDENTIFICATION EXPERTS

Eidos, Etipack, Logopak and Novexx Solutions are part of the division Identification Solutions (PID) of the Possehl Group. This division bundles the activities of the Group in the area of Print & Apply, labels as well as labelling systems. Based on Possehl's principles and the entrepreneurial tradition, Possehl have acquired selected small & medium-sized enterprises under the umbrella of PID in recent years. What unites all these companies? Entrepreneurial autonomy accompanied by additional opportunities through exchange between all of the PID companies.

For more information about PID please visit our website:

Eidos is the leader in the design and manufacturing of printers for labelling, marking and automatic coding of industrial products. For over 40 years the company benefits from a proprietary technology for digital thermal transfer printing that prints variable data in real time.

Thermal transfer printing

Thermal transfer printing is a clean, eco-friendly and safe solution for printing variable data in real time, such as best-before dates, forward or backward number sequences, barcodes, 2D codes, identification codes and more. In this manner, you can intervene on the printing operation directly along the production line without changing the plate or stopping the machine.

Since its founding in 1978, Etipack has specialised in labelling, friction feeders, and pick and place for product handling and distribution.

Friction feeders

To de-stack flat products such as coupons, cards, booklets etc. and insert them into the packaging line, Etipack offers several friction feeders. From automatic friction feeders to pick and place machines.

Pharma industry

Etipack provides different solutions for the pharma industry. From labelling of pharmaceutical boxes to labelling of ampoules, vials and other cylindrical products with a small diameter or which are unstable. Direct coding of serialisation data (data matrix) on pharmaceutical boxes is also one of the many options Etipack has to offer.

Since the establishment of Logopak in 1978, it has become a well-known manufacturer of top-quality and sturdy labelling machines. As pioneers in the field of industrial labelling, Logopak has been committed to supporting industrial clients in developing future-oriented production and logistics processes.

Beverage industry

Logopak has a clear goal when it comes to Print & Apply solutions for the beverage industry. The focus lays on pack, tray and pallet labelling. The pack and tray systems can handle up to 160 labels per minute with variable label data. For the final stage in the packaging process, the Logopak pallet labeller can label up to three sides with label formats up to DIN A3 (up to 120 pallets per hour).

With 50 years of experience in the industrial identification and labelling industry, Novexx Solutions is more than just an expert in the field. The new Novexx Solutions Print & Apply generation is based on the latest technology to meet the Industry 4.0 standards and fulfills today's needs for product labelling and identification as well as supply chain and logistic requirements.

Food industry

The label solutions from Novexx Solutions are very suitable for the food industry, taking care that all products are well identified and compliant to the latest standards and regulations e.g. HACCP. With high speed product labelling and minimum line interruptions the Novexx labellers are the preferred solution in this industry.
